

# The Karma Cycle And The Stock Market

## WHAT IS THE KARMA CYCLE

It is well known that the **Moon Node** is an important parameter in the chart.

Myself, I strongly believe that whatever we are looking in the birth chart, it should be connected to the birth time.

Therefore, using the **Moon Node** alone is not good enough.

The best way to bring in the birth time element is by using to **Focus degree** together with the Moon Node.

### Short reminder:

The **Focus degree** calculated by adding **90 degrees** to the **MC** and then finding the midpoint between **this degree** and between **the Asc**.

The **Focus degree** represents the major life clock.

The **Moon Node** is more about destiny.

**The midpoint between these 2 elements creates a powerful cycle that is sensitive to transits as well.**

## THE NASDAQ KARMA CYCLE CALCULATION

The **Nasdaq** birth date is **Feb 8, 1971 at 10:00 NY**

The **Asc** is **2 Taurus**

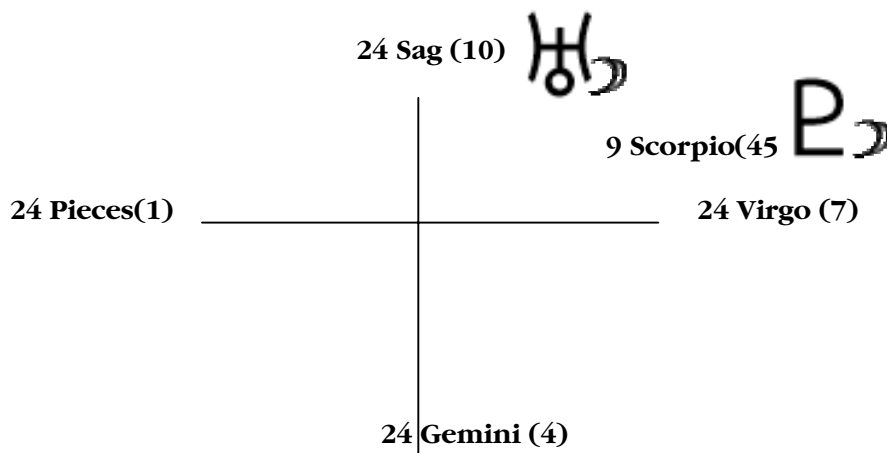

The **MC** is **17 Capricorn**

The **Focus degree** is **25 Aries**-This is the main cycle of the **Nasdaq**.

The **Moon Node** is **24 Aquarius**.

Therefore, the **Karma cycle is at 24 Pieces 30**.

## OCTOBER 1987 CRASH AND THE NASDAQ KARMA CYCLE

As it is a Day chart, Lunar Uranus is on 10<sup>th</sup> house degree of the Nasdaq Karma Cycle.

At the same time, Lunar Pluto is 45 degree from the 10<sup>th</sup> house of this cycle.

**Interesting:** After 11 years at Oct 98, as Uranus reached 9 Aquarius, the Nasdaq began the up move from relatively low point to the all time high.
